Purchase by Transcontinental Adds Interest to Bristow As a Producing Center

The report that the Transcortinental Petroleum company has pur chased the holdings of the Continenchased the holdings of the Continen-ial Petroleum company in the peol which takes the latter company's name, just cost of Bristow. For three-or four million dollars, has added greatly to the Interest which has centered largely in that pool since the big well completed by the Brad-slives & Lewis people a little over 10 days ago and which came in making 5,500 herrels, and is still braking 5,120 harrels.

first 24 bours. Chas D. Peters." This is the fifth well drilled on this 180-acre Osage nation lesse all pro-ducers, three of which have been good for over 1,000 barrels.

Long and associates test on the Morris townsite at the center of the morthwest of the northwest of the southwest communics engaged in the distribution of Fasoline in Minnesota and surrounding territory.

The Union Off Refining company which entered the marketing field during the latter part of 1929, under the management of Mr. Braniand H. H. Crawford, is one which has weathered the period of depression quite creditably. The able and renservative management of the fra territy has placed the company's historical and the company's historical and the company's historical townsite at the contract of the morthwest of the northwest of the northwest of the southwest of the northwest of the southwest of the northwest of the southwest of the northwest of the northwest of the southwest of the northwest of the northwest of the southwest of the northwest of the southwest of the northwest of the northwest of the southwest of the northwest of the southwest of the northwest of the southwest of the northwest of the northwest of the southwest of the northwest of the

Junker and Others Two Failures in Muskogee Drilling In Field

Junker and associates are dritting Sam McPherson's No. 2 Smith farm, in the southeast corner of the northwest of the northwest of 15-14-18, is dry and abandoned at 1.495 in today, having a showing of oil in the top of the 2-733-foot sand, in their test in the southwest of 10-28-7, Eddorado, Kan.

plus if a woven wire, hogtight tarm, fence were built around the 16 oil-producing states."

The government-owned and operated rallroads of Mexico burn oil and many stationary builers use it, but in Mexico City, with only two companies supplying the bulk of the fuel oil, there is at times trouble and delay in getting deliveries and prices are pretty high, considering the great quantities of oil produced in the republic. Only where fuel oil can be delivered by water does the bustness seem to run smoothly. It is interesting to note, in passing, that some New England mills and furnaces are quitting fuel oil for local because of unsatisfactory deliveries, quality and prices. The possimistic prophecies of the "superaseintists"—as Fom O'Donnell, prasident of the American Petroleum Institute, calls 'em—have caused containing the minds of situte calls 'em-have caused con-siderable anxiety in the minds of many fuel oil consumers lest the supply will peter out and leave them all carboned up and nothing to burn. This statement isn't sarcastic burn. This statement isn't sarcasti-rejoinder by any means, but is sure chough truth. Help yo'se'f.
